

Rotary Wafer Switches

ML Standard Contact Arrangements

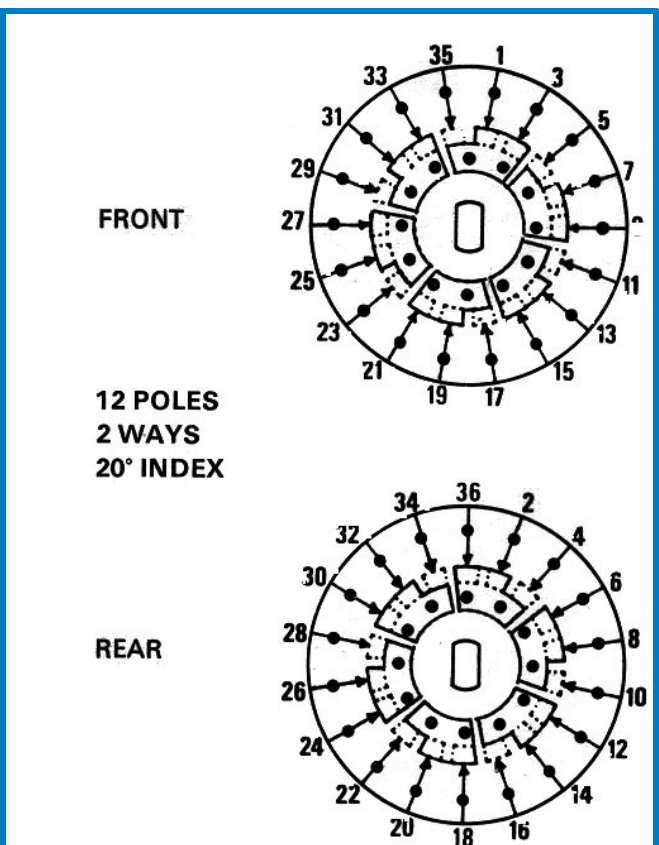

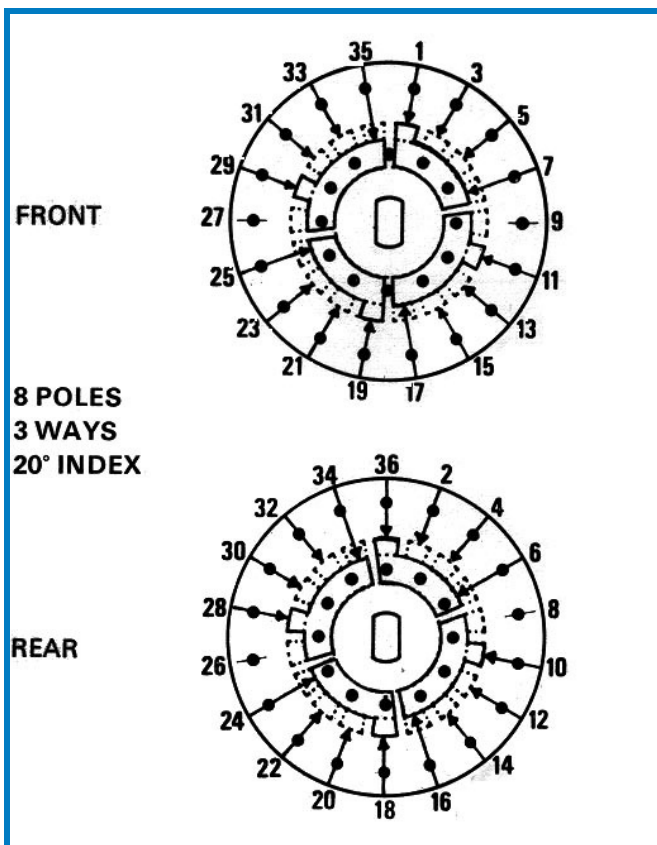

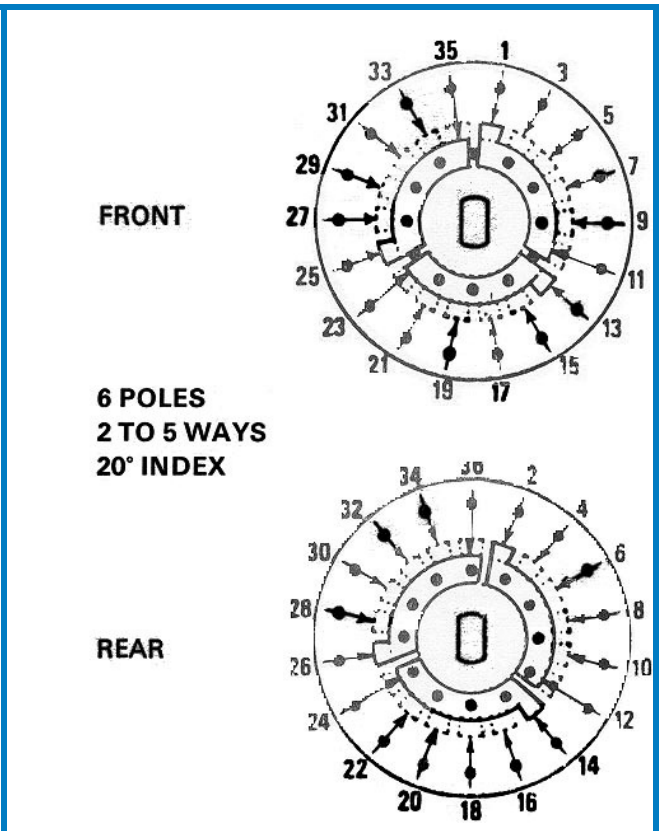

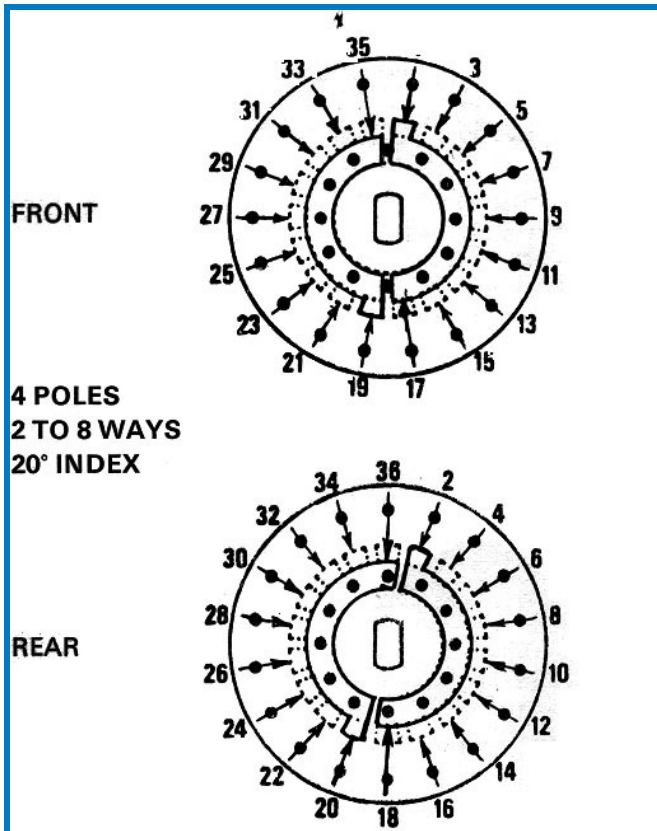

ENGINEERING BULLETIN NO. RW 33a

The diagrams on this Bulletin show the standard contact arrangements possible for the Model ML. When specifying, please refer to these layouts, all of which are viewed from the knob end with the switch in the fully anti-clockwise position; the rear being viewed through the front.

Rotary Wafer Switches

ML Standard Contact Arrangements

Please Note: In line with continued development we reserve the right to amend specification without prior notice (Rev 01/12)
