

Environmental Policy Statement

NSF Controls recognises the impact that its business activities and products may have on the environment. We are therefore committed to reducing our environmental impact, as far as reasonably and financially practicable. Also, to continually improve our environmental performance as an integral and fundamental part of our business strategy and operating methods by the participation and support of our employees.

To achieve this, we will:

- Comply with or exceed the requirements of relevant environmental legislation and codes of practice and prevent pollution.
- Minimise the generation of waste and then reuse or recycle as much of it as possible.
- Seek to optimise the use of energy and other resources in our business in order to minimise our consumption of natural resources.
- Develop and maintain the awareness and competence of employees by effective training and communication.
- Measure, monitor and review to continually improve our performance.

Compliance with this policy will be demonstrated through regular audits and reviews by the senior management team.

Signed.....

Sarah Birch (Managing Director)
